

Changes Made and Why:

- We changed the position of the cart button in the navigation bar because bootstrap would not allow it to move to the left.
- We changed the home page; in the original design it had a black image around the content but and white background but to make the pages more consistent we just made them all the same background. This smooths out the transition between pages.
- The slider is wider than the original design to suit the larger screen size.
- The catalogue page also includes a wider grid to suit larger pages, we also added more products to fill in the space.
- We changed the size box colours to make them easier to read as the black background made it difficult to read.
